The State of MUSIC

The MUSIC Staff will take some time to bring you up to date on the continued success of your program through the end of 2021, our plans to address a few of the savings opportunities in 2022, and present practical ideas on how members can take better advantage of the services offered. We will also walk you through the current state of the insurance marketplace and how it interacts with a large self-insurance pooling program like MUSIC. We think you will walk away being very glad to be part of this member-owned organization!

Intelligence Community Cybersecurity Update and the Urgent Need for Cybersecurity Education

This presentation will provide an overview of the latest cybersecurity threats as described by the Office of the Director of National Intelligence in their latest presentation to congress. Additionally, we will look at recent attacks on critical infrastructure and discuss the urgent need for cybersecurity education and the role that Missouri schools can play in addressing that need. The Missouri Cybersecurity Center of Excellence (MCCoE) is a newly formed 501(c)3 with a mission of cybersecurity education supporting Missouri schools. The presentation will conclude with an overview of the MCCoE and how it can help your schools meet this urgent and growing need.
